MODEL No. PMC 3.0 Prima Series

Presto color matching cabinet Spectrum -1 is a simulation tool, which is mainly used in quality control. The color matching cabinet accurately corrects light types and thus allows direct comparison of products that must have special color characteristics. The color matching cabinet supports five possible lighting types. These colors are supplied as standard: ,"D65", "TL84, "UV", "CWF" and "TFL

We have made all these features available to you from latest and fastest Human Machine Interface (HMI). You can generate and download the soft copy of the report in-a-go in pdf format by inserting a USB in the HMI.

We have provided you with the Light to control through remotely .

- Fastest Human Machine Interface (HMI) powered by Cortex-A8 high speed processor
